

CANTABRIAN LANDING AREAS

Cantabrian Landing areas are manufactured to various sizes suitable for schools, training and High End Competition. They are expertly designed to absorb a jumper's full impact energy to ensure a soft and secure landing for the Athlete. All Cantabrian Landing Areas are manufactured in house by our team of experts that have years of experience both designing and manufacturing High Jump and Pole Vault landing areas

Cantabrian International High Jump 6m x 4m x 0.7m

Cantabrian International Pole Vault 8m x 6m x 0.8m

Mesh sides allow rapid air displacement

Module construction

CANTABRIAN LANDING AREAS

Construction

- The individual modules are constructed from a tough flame retardant reinforced PVC coated polyester cover, which is filled with high quality polyurethane foam giving excellent cushioning properties
- The back 6 modules on the pole vault landing mats are fully interchangeable with each other, which allows them to be swapped around to help prevent wear and tear of one particular module that gets consistently landed on. Also allows for easier storage and transportation
- Our Spike resistant wearsheet's sit flat on the main modules and are securely connected using heavy duty clips & D rings
- All modules connected with reinforced Velcro straps
- This unique combination of foams and mesh sides allows rapid air displacement when competitors land which allows a softer, but safe landing.
- The Foam is castellated so it allows the Athlete to decelerate at a speed that is comfortable and secure
- Specifically designed to help prevent wear and tear with all seams and joints, joined by double or triple stitching with special welded joints.
- A high quality of woven spike sheet mesh is used to ensure the best possible resistance to damage from spikes and is included in the price

CANTABRIAN LANDING AREAS

SCHOOLS HIGH JUMP LANDING AREAS	DIMENSIONS	PRODUCT CODE
SCHOOLS	5M X 2.5M X 560MM – INCLUDES SPIKE PROOF WEAR SHEET	C-HJ001WS
7 MODULES - NO CUT OUTS	4 MODULES MADE UP TO 2.5M X 1.66M X 255MM – ~ 17KG EACH	
	3 MODULES MADE UP TO 2.5M X 1.25M X 255MM – ~ 14KG EACH	
SCHOOLS PRO	5M X 2.5M X 560MM – INCLUDES SPIKE PROOF WEAR SHEET	C-HJ002WS
3 MODULES WITH CUTOUTS	3 MODULES MADE UP OF APPROX 2.5M X 1.7M X 0.5M – ~40KG EACH	

COMPETITION HIGH JUMP AREAS	DIMENSIONS - INCLUDES SPIKE PROOF WEAR SHEET	PRODUCT CODE
CLUB	5M X 3.0M X 0.65M – COMPLIES WITH UKA	C-HJ008
